JAN ERNST COLLECTABLE DESIGN

Jan Ernst is a multi-disciplinary creative specializing in functional art and spatial design using clay as his main medium. The work is driven by his fascination with natural structures such as corals, fungi, and rock formations.

His organic designs stem from his abstract understanding of form and space influenced by his background in architecture, connection with the natural world, and South African heritage.

Geneva / Switzerland
Objects with Narratives

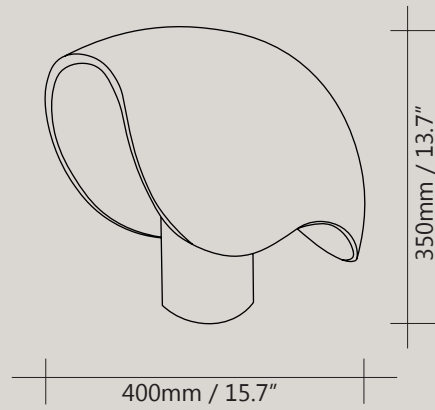

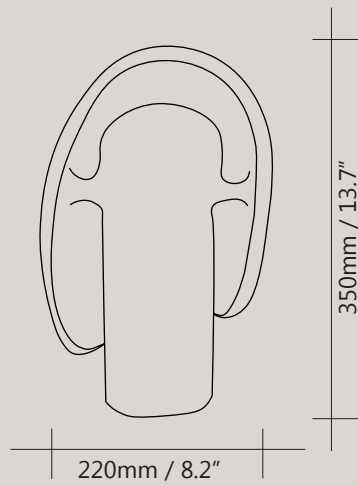

concept

“Growing up on a farm in South Africa, I spent a lot of time outdoors in nature. Trees have always held multiple meanings for me: they are a sanctuary and a safe space. There is something inherently architectural about trees which encourages a sense of place in a way that is very comforting – after all we build house with and in trees! Yet woods and forests are also places of wonder and whimsy where I escape to when I want to dream of different ideas and even create make-believe worlds. You can consider this new collection an ode to the tree!” ~ Jan Ernst
